THURSDAY MORNING, MAY 17, 1868.

FROM EUROPE.

ARRIVAL OF THE CITY OF PARIS AND GERMANIA-AUS-TRIA AND PRUSSIA-PRUSSIAN TROOPS AD-VANCING-ITALY ANXIOUS FOR WAR -AN ITALIAN FLEET ON THE SEAS.

New York, May 13.—The steamships Germania and City of Paris have arrived from Southampton and Liverpool respectively. The Persire arrived at Brest and the St. George at Queenstown on the 1st instant. The Hecla arrived at Liverpool on

1st instant. The Hecla arrived at Liverpool on the 2d instant.

The news continues very warlike as regards Austria and Italy. Active preparations are being made oh both sides, and there is great uneasiness

made oh both sides, and there is great unbasiness and distrust on the various exchanges.

The British Government will go on with the Reform bill, but will introduce a bill for redistributing seats for consideration at the same time.

The steamer Bosphorus left Liverpool on the 28th uit, to search for and assist the City of Washington.

Washington.

Contrary to rather general expectation the British Ministry have refused to regard the close vote on the Reform bill as an equivalent to defeat. Mr. Gladstone announced in the House of Commons that the Franchise bill would be pressed on, but the bill for the redistribution of seats would be introduced on the 7th, so that both might be considered together. In reply to an inquiry if the government would stand by the bill, he said: "as long as the bill stands we stand, if It falls we fall."

it falls we fall."

The Liberal papers rejoice that the issue is now plain, and that the Liberal members must now face the pure and simple question without protestation of an evasive amendment. The Jamaica Commissioners had arrived in England. Nothing

commissioners had arrived in England. Nothing official was known as to their report, but the Times anticipates that it will justify the martial law, but censures the subsequent proceedings. A police constable had been shot dead in Dublin by Fenians.

The German question continues warlike, but the relations between Austria and Italy are decidedly menacing. Both governments deny aggressive designs, but both are represented as vigilantly preparing for war. The Italian Parliament promptly voted authority to the government to raise means for the defence of the country. A popular meeting had been held at Naples in fayor of the government armament, and the enthusiasm is represented as general throughout Italy. In view of the probable war it is asserted that the Italian government has called out 150,000 men. The Austrian force in Venetia is computed at 160,000.

The Florence correspondent of London Times says there can be no doubt that the Italian government desires war, as the only means of extrication from an exceedingly false and difficult situation.

The Austro-Prussian relations show no improvement. A Berlin dispatch talks of the prova-bility of increased armaments by Prussia. There is a severe panic on 'Change in London and Paris, and the funds and securities are all

and Paris, and the funds and securities are an materially depressed.

Napoleon presided at a special council of ministers on the 30th, a report says to consider the Austrian proposition that Austria and Italy should simultaneously disarm. One rumor says it was determined at the meeting to prevent Italy from taking the aggressive, and to insist on her acceptance of the Austrian proposition.

It is stated that the Austrian iron-clads have received orders to put to sea. Their destination is believed to be the German Ocean and the Balis believed to be the German Ocean and the Bal-tic. A Berlin telegram says the reply of Austria to the last Prussian dispatch received, dated the 26th, states that Austria will withdraw into the interior the troops now on the Prussian frontier; but will, at the same time, continue her armament against Italy. The Prussian troops upon the frontier are said to have advanced nearer to the Austrian territory. It was rumored in Vienna that Austria intends to propose a European Con-gress. Rumors of a ministerial crisis are still current in Vienna. The Saxon Minister of Foreign Affairs is said to have returned a verbal and eva-Affairs is said to have returned a verbal and eva-sive answer to the Prussian rumors to disarm. A Berlin telegram, of the 1st instant, says it is be-lieved that the Prussian armament will be shortly increased. A reply, dated the 29th, to the Austrian note has been sent to the Prussian Embas trian note has been sent to the Prussian Embas-sador in Vienna, stating that Prussia does not agree to the Vienna Cabinet's proposals in refer-ence to the Duchies. It lays special stress upon the community of interests of Prussia and Italy, and gives an evasive answer to Austria's proposal for disarmament. No immediate rupture between Austria and Prussia is, however, expected, as Austria will submit her proposals to the Federal Diet.

Diet.

The Vienna Presse of the 1st states that the negotiations between the Prussian Cabinet and Special Envoy of Italy continue. The Official Vienna Gazette publishes a notice that an increased number of army surgeons is required. In a circular dispatch to the Italian Representatives, General La Marmora states that at the moment when the disarm ment of Austria and Prussia was expected itself users beyond the Austria. ed. Italy saw herself directly menaced by Austria. ed, Italy saw herself directly menaced by Austria, who increased her armament and gave them in Venetia an overtly hostile character toward us. It then became indispensable for the security of the kingdom, that both the land and ses forces should be increased without delay. In taking the military measures required for the defence of the country, the government has only acted in accordance with the state of things created by Austria. A Florence telegram says a proclamation has been issued by the Minister of War, calling under arms the soldiers on unlimited foring under arms the soldiers on unlimited fur-loughs. A Mexican officer had arrived at Vienna on a special mission, bearing a letter from Maxi-milian, the purport of which is unknown.

NEW ORLEANS, May 11.—Corron—There has been a very active and general inquiry to-day for the leading staple, which has resulted in sales of 3675 bales, at an advance of fully 1 cent per pound upon yesterday's quotations. Offerings exhibited some increase, but they were insufficient, however, and not assorted to suit the views of a majority of buyers. In the absence of later favorable advices from the North or from Europe, it may be well to state that the increased inquiry to day was exclusively due to the very heavy falling off in receipts, the unfavorable advices of the growing crop, and the disastrous results apprehended on account of the crevasses. The movement was participated in by fourteen brokers, three of whom took 2600 bales. We have revised our figures to correspond with the improvement, and now quote ordinary nominal, good ordinary at 30 to 31 cents, low middling at 32 to 34 cents, and middling at 35 to 37 cents. The up ward tendency of foreign exchange, taken in connection with the auxiliaries reterred to above, t-nded considerably to the advantage of factors.

kept the article on a steady advance during the week, and the sales were restricted to 0819 bbls. The supply of superfine and extra brands is scarce and very firmly held, while the lower classes are plenty with but little or no demand. There has been a very good inquiry, but sellers are still nolding for higher prices. The sales amount to 1619 bbls, of which 400 choice extra on private terms, 200 extra at \$13 50, 100 do at \$13, 169 do at \$12, 160 low extra at \$13 50, 100 do at \$13, 169 do at \$12, 160 low extra at \$11 50, 500 superfine on private terms, 50 do at \$10 50, and 100 musty common at \$4 75 per bbl. Week's receipts amount to 10,606 bbls, and exports 6340 bbls.

Cons.—The operations for the week have been heavy. The supply on hand was large, while the receipts being in excess of the sales, have caused a decline of about 160 per bushel; but the mark t closed firm to-day. The week's sales amount to 66,434 sacks, including 27,457 sold to-day in the following different lots, viz: 350 white at 95c; 8277 and 500 do at 90c; 1600 yellow at 88c; 530 mixed at 85c; 13,200 uo at 85c, and 3100 yellow mixed at 830 per bushel. New York Market.

The money article of the New York World, of the

12th, says:
The accumulation of unemployed funds in this city The accumulation of unemployed funds in this city seeking employment in short or temporary loans threatons a plethora of loanshle funds, which will certainly find vent in the hands of speculators, probably in stocks, as the easiest to get in and out of, unless the Treasury Department inaugurates, without delay, some movement which will employ the funds in government securities. Large sums are begging for employment at four per cent to strictly first-class borrowers; and four to five per cent comprise the range to those borrowers who command the confidence of the banks and moneylenders. The legitimate trading of the country will not dissurb the ease in money until the demand in August and eptember for funds to move the crops. If Congress intends to pass Mr. Sherman's Funding bill, the sooner it becomes a law the better, in or let that government may avail itself of the present extraordinary accumulation of unemployed funds at the money centres. The bill ought to have been passed and in operation at the beginning of April, at the very latest. These remarks as to the prompt passage of Mr. Sherman's Funding bill are not intended as any expression of opinion as to its merits.

The foreign exchange market was less firm at the close of the week, prime bankers' sixty-day sterling bits baying been sold from second hands at 109% to 109%, although the drawers' quotitions are 109% to 109%, although the drawers' quotitions are 109% to 200 from second hands at 109% to 109%. The exports of produce for the week ending May 8 were \$3,219,010 in currency, or about \$2,500,000 in gold, against \$4,767.121 in gold, equal to shout \$6,000 in currency. The leading bankers were offered to day 109% in round sums for sterling bills by the Scotis, which sails on Wednesday next, but they declined to sell.

Cornwall & Zerrega notice the week's business thus: "We have to report for the week a quiet market at very uniform prices. The demand for export and speculation continues very light, but there is a somewhat improving spinning demand. There is a fair amount of Cotton offering, but all good grades are very firmly held, and sell readily at quotations, while low grades sell only, slowly. Our advices show a heavy decline in receipts at all points. Reports from most sections of the South are not favorable for the next season's Cotton crop. Apparently well authonticated advices show much troubte from imperfect seed, severe frosts and overflows. While it is yet too early to estimate with any decree of satisfaction as to the amount of the next crop, these advices are having an effect on our market, and were it not or the large and accumulating stocks in Liverpool, holders of Cotton would be able to secure a decided advance in prices. LANAYETTE, KE., June 21, 1860.

I am a graduate of the regular Medical Colleges, light een months ago I had seven cases of severe femals disease which I had entirely failed to cure. One hady had constant hysterics; one had every symptom of epileptic convulsions consequent upon deranged menstrustion; others had whites, italing, irregularities, and all the severe symptoms of continued uterine derangement. Having my attention called to MARSHALL'S UTERINE CATHOLICON, I used it, and it cured every case. There has not been a single failure in its operation.

The Uniel Uauses of Pestilence Destroyed.

Dr. E. Courtaret S disinfecting Fluids, Secured by Letters Patent in the United States and France. Prepared solely by the New York Disinfecting Company, at their Laworatory, Nos. 298, 300 and 392 Henry-street, N. Y. Office, 42 Cedar street.

This Company, organized on a permanent busis, with Dr. Courtaret, the colebrated French Chemist, in charge of its Laboratory, is prepared to furnish its 1 isinfecting for sick rooms, nurseries, urinals, water closets, privies, cesspools, sewers, gutters, ships, railroads, hospitals, prisons, and public institutions of all kinds, slaughter-houses, offal and fat-boiling establishments; all kinds of manures (immensely increasing the value of the latter to every farmer), and wherever poisoneus and offensive gasses exist. These agents are decdorizers, antispites, antispites, antispites, antispites, antispites, antispites, and not mensely increasing in the scientific meaning of the wirds. They remove noxious gasses and odors by chemical principles—leaving in their places healthful air; they are Destroyers, and not merely absorbents of poisonous gasses—not injurious to utensils in which they are used. The attention of medical and scientific men is duceted to these disinfectants. Attached are testimonials in avoir of this great discovery, which, with hundreds of others, can be seen at the Company's office.

Delayan House. At Bany, March 30, 1866.
